

1000 lb (1/2 ton) MAX CAPACITY

Each Snaptrac rail includes two (2) HANGER PLATES. HANGER PLATES allow the Snaptrac rail to be ceiling supported if necessary. If the Snaptrac system ONLY uses posts then you will not use the HANGER PLATES provided. On the other hand, if a support location does not use a post, the HANGER PLATE must be used in conjunction with a user provided clamp to hold the HANGER PLATE in place. Kundel does not supply this clamp.

IMPORTANT: The hanger plate is provided to attach to an additional structure. This plate is guaranteed for a specific load rating and can only be used in conjunction with the manufacturer's recommendations. The perimeter holes are provided for 1/2" SAE Grade 5 HHCS.
